fundamental technology

x

gamefi

collectively enables and accelerates people to do civic good, mass adoption

Chris Dixon

Web3 gaming can change the whole economic model of the gaming industry.

David Hong, Game lead for Red Building Capital

Games should be coming out of gaming studios recruiting blockchain experts.

creating user end applications

Web3 adoption session

avalanche x FIDE

International Chess Federation (FIDE) is developing Web3 products on Avalanche for over 500M chess players globally.

- Calculating official player ratings on-chain
- Publishing tournament data on-chain
- Adding personalized experience on-chain
- Releasing a FIDE game explorer, powered by on-chain game data

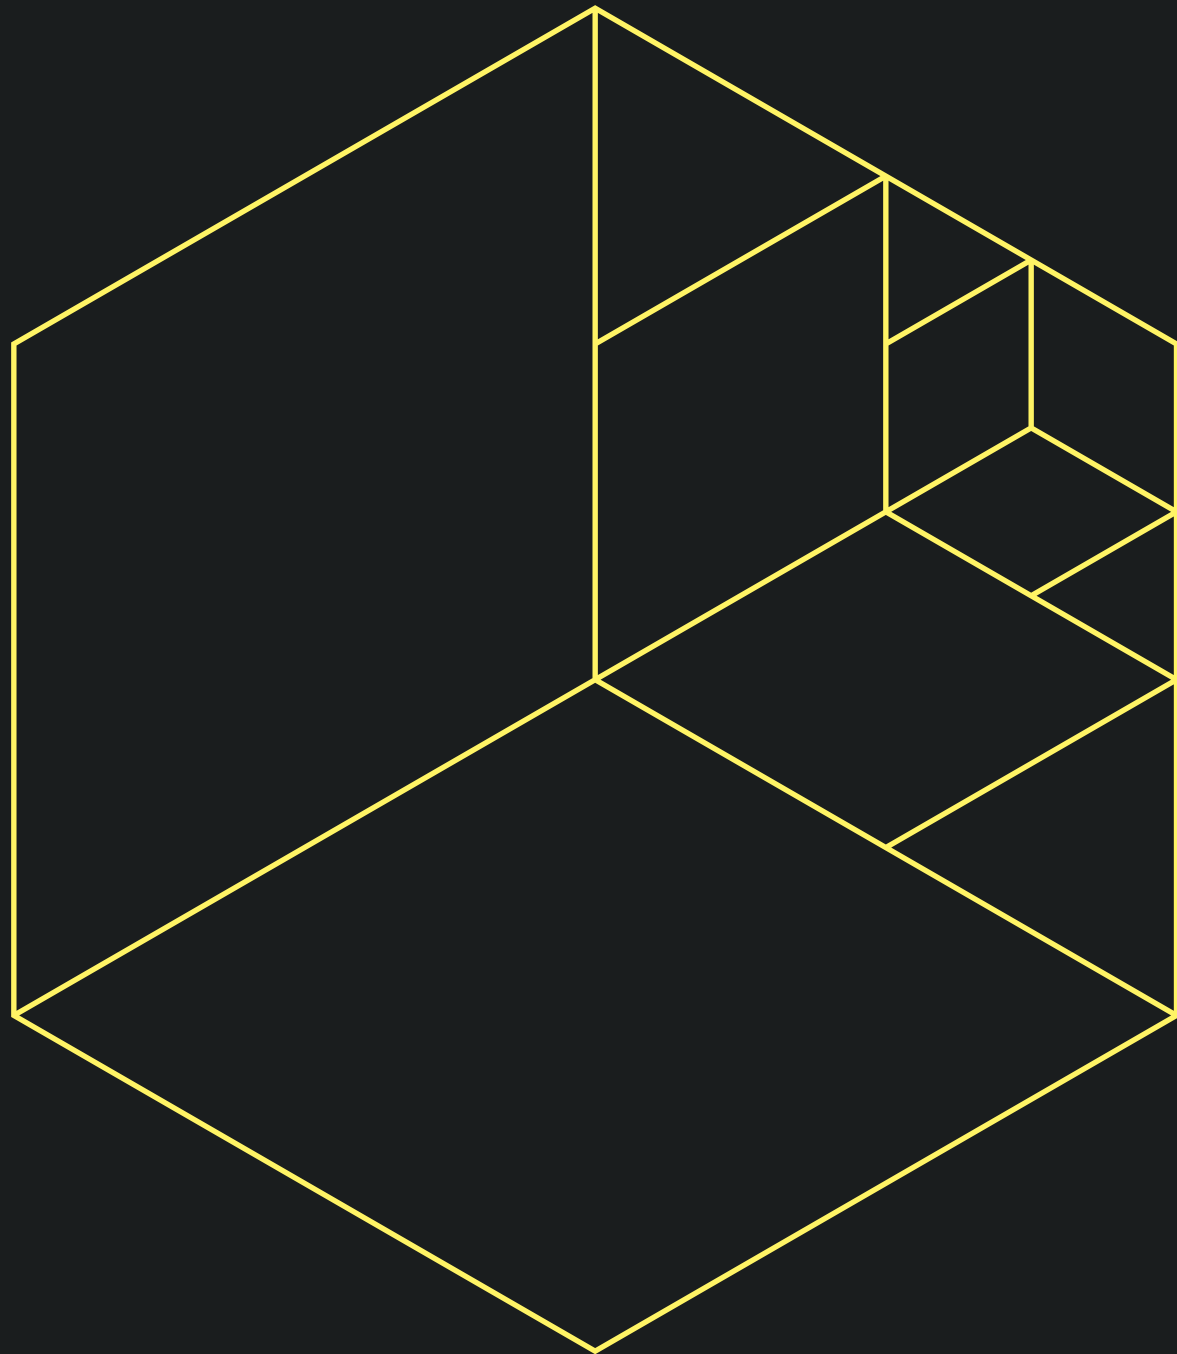

to "empower communities
to build and fund open
source public goods"

– Gitcoin

Since its launch in November 2017, Gitcoin has helped 188,653 funders reach an audience of 479,773 earners.

benko

mass adoption

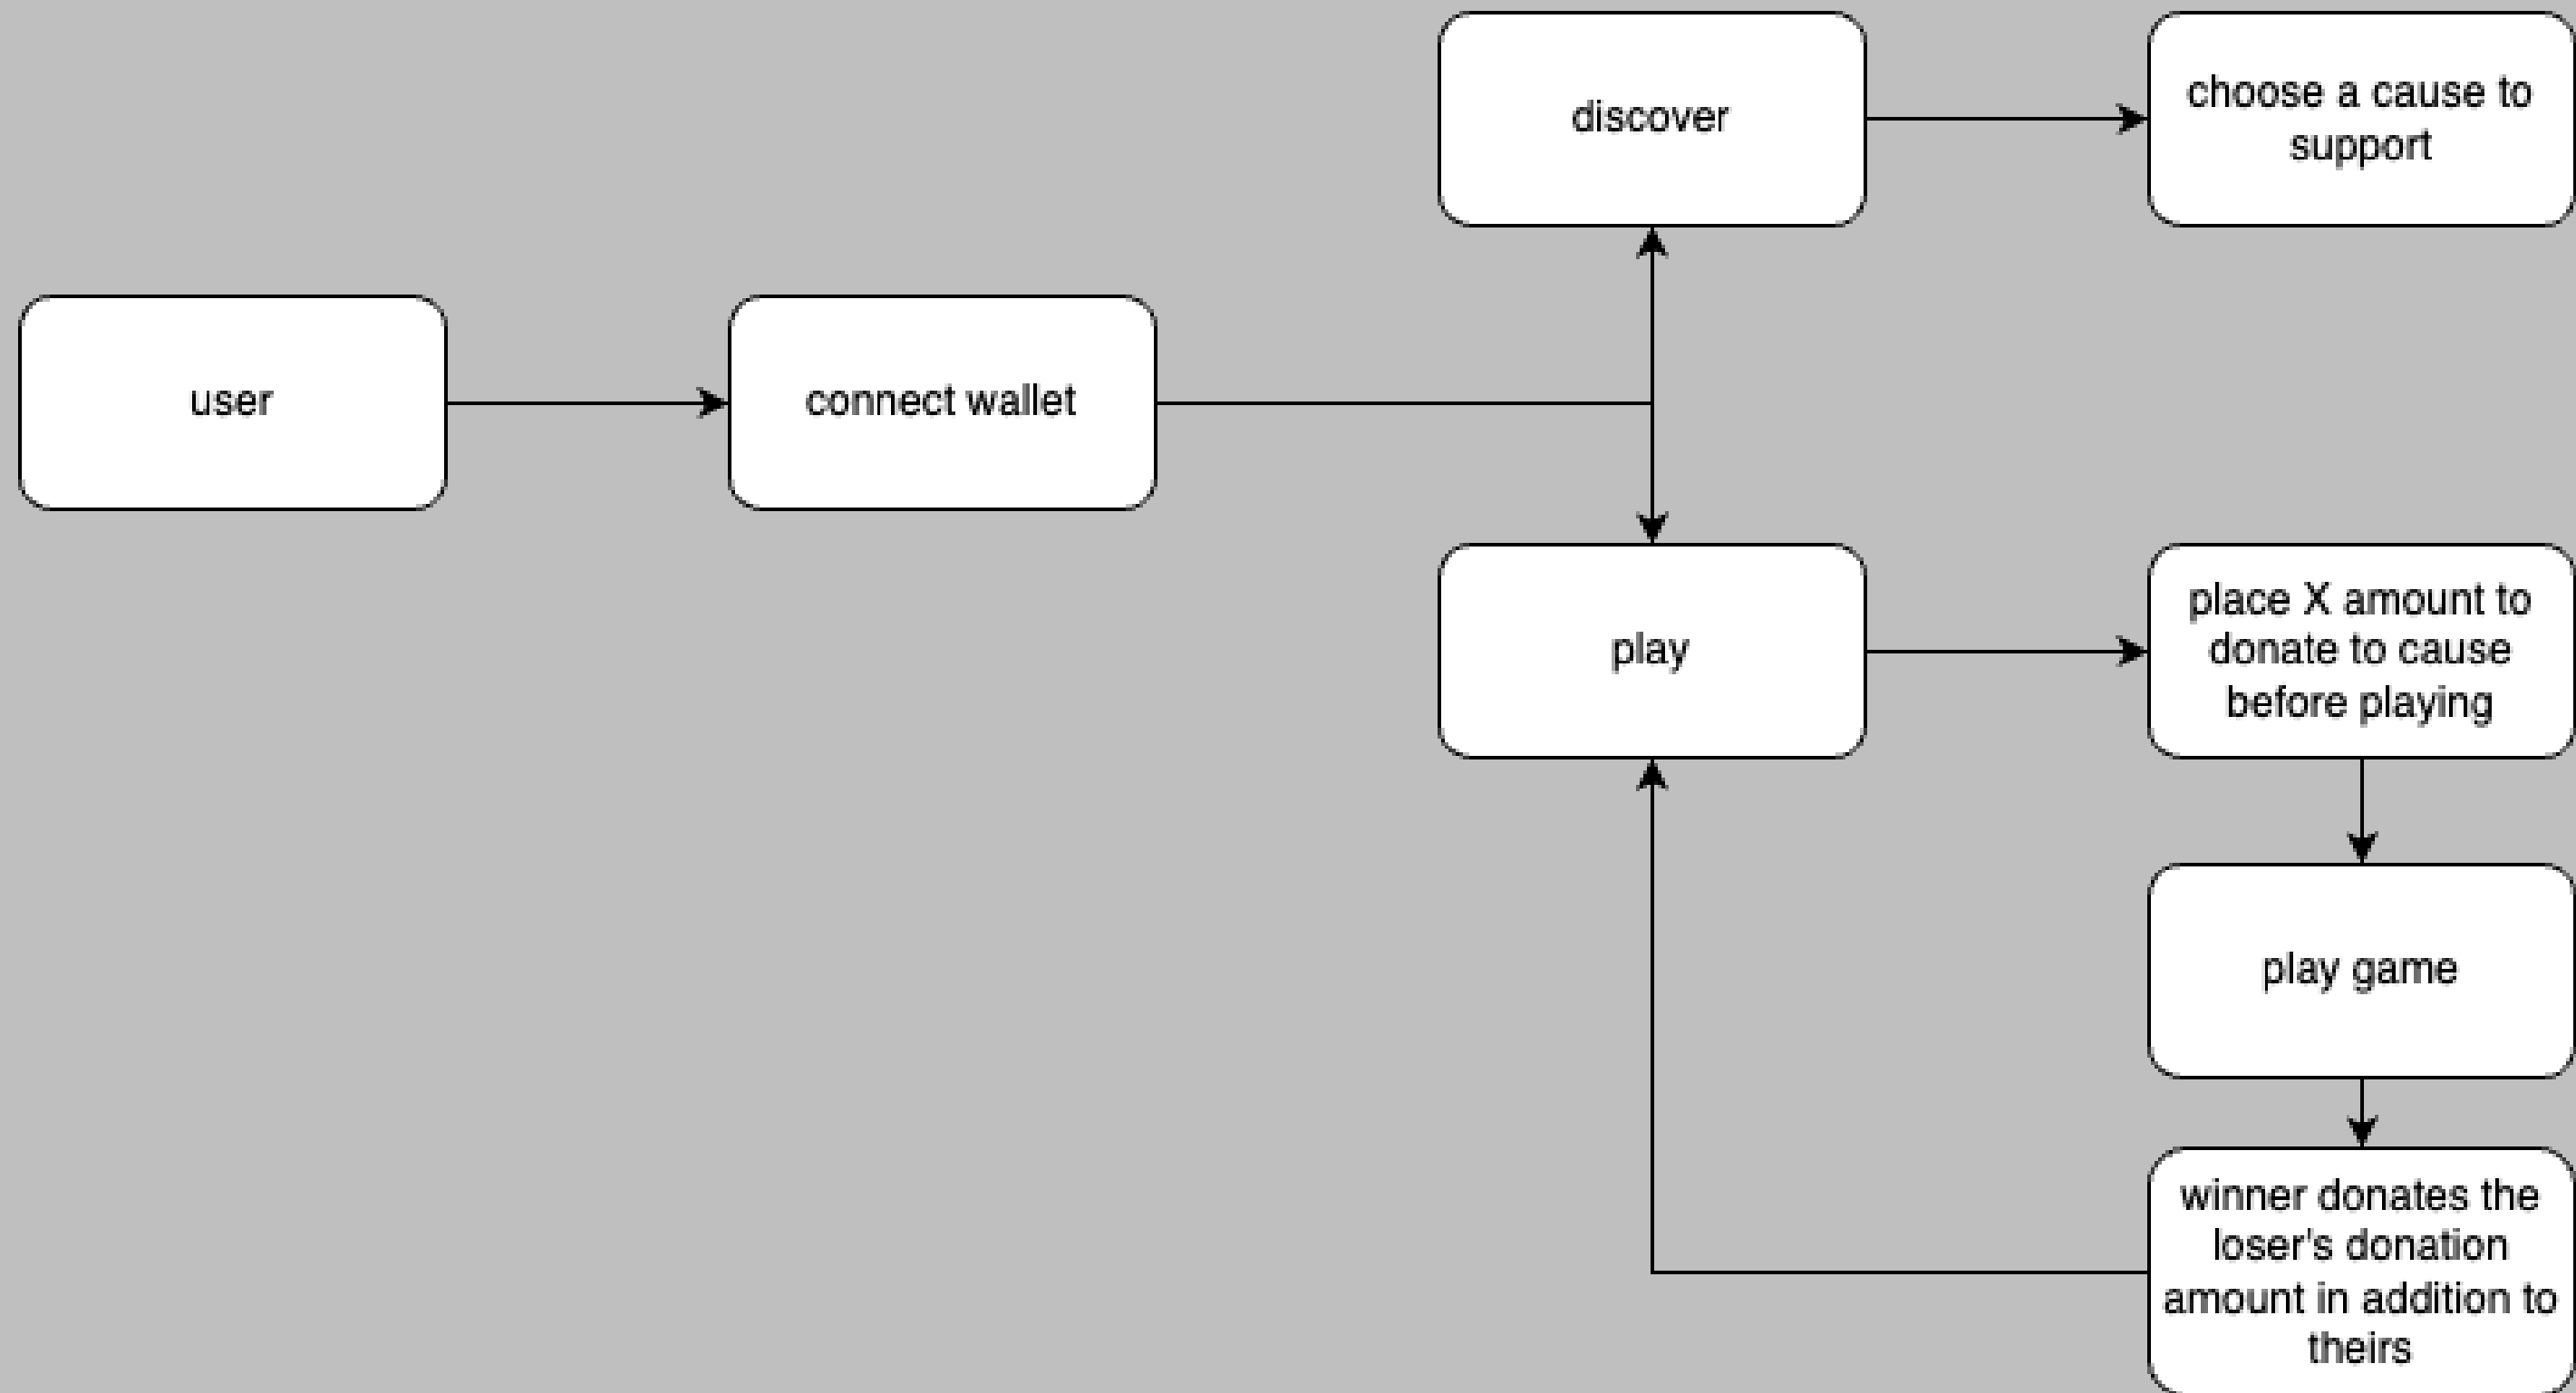

and provides instance for avalanche partnership

gamifying

expands into a rapidly growing sector of web3 by combining parts of Gitcoin's ideology into GameFi.

subnets

customizability for execution, consensus, and network layers

future works and applications

- **modding game**

implementing features like TreasureChest, bidding wars on high ranked games (e.g. official FIDE matches), Anichess

- **decentralized chess**

- **bringing more adoption to web3/avalanche**

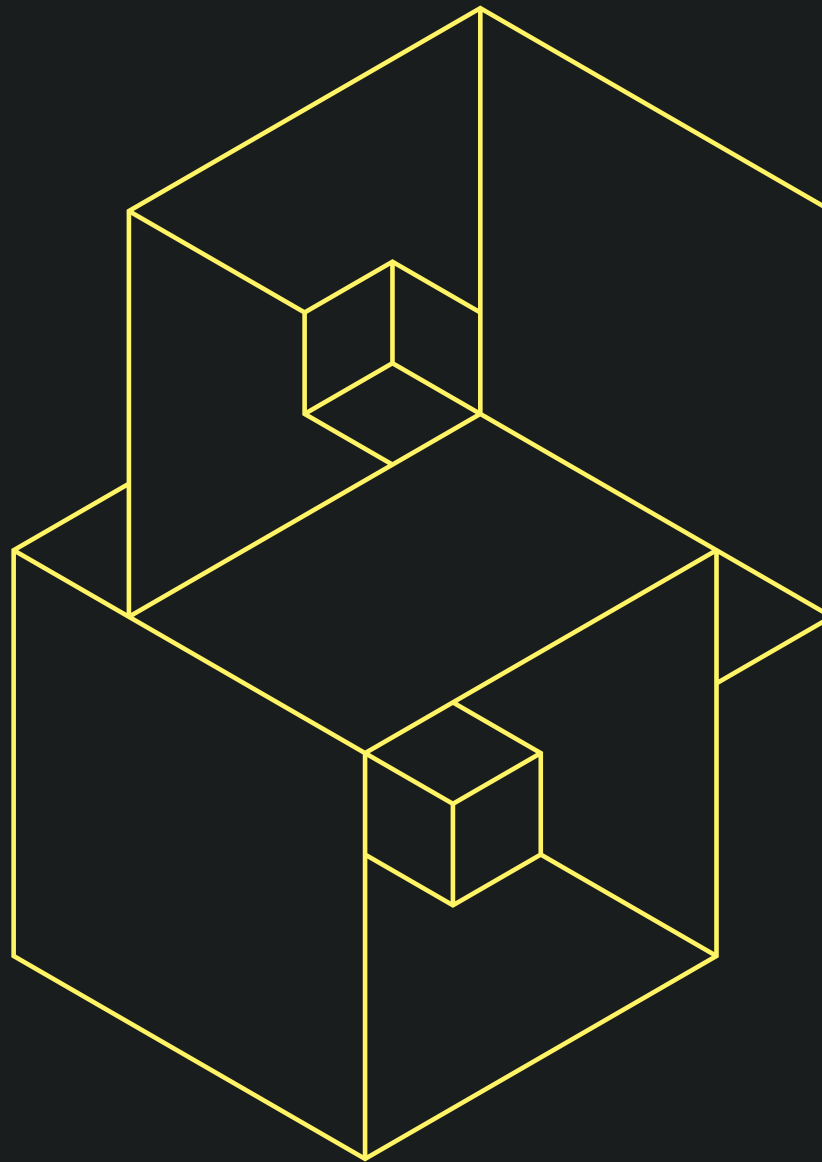

Elaborate on what you want to discuss.

- **expand to other games**

from simple 2 player games to large AAA games
